MSL Field Interaction Notes ? Confidential (Synthetic Demo Data)

Document ID: MOE-MSL-FIELDNOTES-2026-Q3 | Entries: 85 | Generated for Medical Omnichannel Intelligence demo

NOTE: All HCPs, interactions and patient references are fully synthetic. For internal demonstration only.

MSL-FN-0001 | 2026-07-12 | In-person visit | Duration: 23 min

HCP: Dr. Daniel Ramirez (Breast Oncology)

Site: Baptist Health System, Baltimore, MD

Primary TA: NSCLC | MSL: Dr. Marcus Webb

Note: Dr. Daniel Ramirez attended our advisory board and asked detailed questions about duration of response and long-term efficacy. Interested in collaborating on an investigator-initiated study. High-value KOL ? prioritize follow-up.

MSL-FN-0002 | 2026-07-03 | In-person visit | Duration: 36 min

HCP: Dr. Carlos Robinson (Thoracic Oncology)

Site: Baptist Medical Center, Philadelphia, PA

Primary TA: NSCLC | MSL: Dr. Nina Patel

Note: Dr. Carlos Robinson asked about efficacy in HER2-low disease following DESTINY-Breast04 and is currently comparing outcomes against sacituzumab govitecan. Neutral sentiment; requested comparative evidence and relevant subgroup analyses.

MSL-FN-0003 | 2026-06-24 | In-person visit | Duration: 49 min

HCP: Dr. Robert Martin (Medical Oncology)

Site: Memorial Oncology Institute, Philadelphia, PA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Tom Reyes

Note: Dr. Robert Martin requested efficacy and tolerability data in elderly and frail patients, citing tolerability concerns. Interested in dose-optimization studies. Neutral-to-positive; follow-up with real-world tolerability data.

MSL-FN-0004 | 2026-06-15 | In-person visit | Duration: 62 min

HCP: Dr. Robert White (Thoracic Oncology)

Site: Providence Health System, San Francisco, CA

Primary TA: NSCLC | MSL: Dr. Priya Raman

Note: Dr. Robert White inquired about dosing modifications and antiemetic management with T-DXd. Reports good clinical responses but wants practical guidance for the community setting. Requested nurse education materials; follow-up requested.

MSL-FN-0005 | 2026-06-06 | In-person visit | Duration: 20 min

HCP: Dr. Linda Jackson (Radiation Oncology)

Site: Cedars Comprehensive Cancer Institute, Dallas, TX

Primary TA: HER2-mutant NSCLC | MSL: Dr. Sam Okafor

Note: Dr. Linda Jackson is an emerging investigator asking about combination strategies with immunotherapy. High scientific curiosity and growing interest in ADC combinations. Requested preclinical rationale and trial-enrollment information.

MSL-FN-0006 | 2026-05-28 | In-person visit | Duration: 33 min

HCP: Dr. Rajesh King (Breast Oncology)

Site: Metro Oncology Institute, Atlanta, GA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Hana Kim

Note: Dr. Rajesh King expressed strong interest in real-world evidence for long-term outcomes beyond the

trial population. Skeptical of cross-trial comparisons; requested head-to-head data where available.
Highly engaged academic KOL.

MSL-FN-0007 | 2026-05-19 | In-person visit | Duration: 46 min

HCP: Dr. Nancy Davis (Radiation Oncology)

Site: Regional Oncology Institute, Baltimore, MD

Primary TA: HER2-low Breast Cancer | MSL: Dr. Alan Brooks

Note: Dr. Nancy Davis raised an unmet need around ILD early-detection and monitoring guidance in real-world practice. Very engaged; requested an educational webinar for the care team and a pulmonology collaboration follow-up.

MSL-FN-0008 | 2026-05-10 | In-person visit | Duration: 59 min

HCP: Dr. Ravi Hernandez (Gastrointestinal Oncology)

Site: Northwell Oncology Institute, New York, NY

Primary TA: NSCLC | MSL: Dr. Elena Ruiz

Note: Dr. Ravi Hernandez asked about optimal sequencing of ADCs and resistance mechanisms after prior T-DXd, comparing with tucatinib-based combinations. Very engaged; wants a scientific exchange on sequencing after the next tumor board.

MSL-FN-0009 | 2026-05-01 | In-person visit | Duration: 17 min

HCP: Dr. Sofia Rodriguez (Medical Oncology)

Site: Memorial Medical Center, Los Angeles, CA

Primary TA: Colorectal Cancer | MSL: Dr. Greg Sullivan

Note: Dr. Sofia Rodriguez asked about quality-of-life and patient-reported outcomes data. Interested in shared decision-making tools for patients. Positive; requested approved patient education materials.

MSL-FN-0010 | 2026-04-22 | In-person visit | Duration: 30 min

HCP: Dr. Rajesh Kim (Radiation Oncology)

Site: Presbyterian Comprehensive Cancer Institute, Dallas, TX

Primary TA: Colorectal Cancer | MSL: Dr. Karen Mitchell

Note: Reviewed Colorectal Cancer data with Dr. Rajesh Kim, focused on HER2 amplification as an emerging target. Interested but noted a limited relevant patient population. Low near-term interest; values ongoing scientific updates.

MSL-FN-0011 | 2026-04-13 | In-person visit | Duration: 43 min

HCP: Dr. Michael Moore (Thoracic Oncology)

Site: Mercy Hospital, Phoenix, AZ

Primary TA: HER2-mutant NSCLC | MSL: Dr. Marcus Webb

Note: Dr. Michael Moore raised detailed questions about interstitial lung disease (ILD) monitoring and dose management with Enhertu. Concerned about tolerability in older patients. Requested the approved safety summary and pneumonitis management algorithm. Follow-up needed within two weeks.

MSL-FN-0012 | 2026-04-04 | In-person visit | Duration: 56 min

HCP: Dr. Sandra Young (Medical Oncology)

Site: Baptist Comprehensive Cancer Institute, Houston, TX

Primary TA: HER2-mutant NSCLC | MSL: Dr. Nina Patel

Note: Engagement with Dr. Sandra Young centered on patient selection and biomarker testing for HER2-mutant NSCLC. Compares experience with prior targeted agents. Requested the relevant DESTINY publication and a testing algorithm. Positive tone.

MSL-FN-0013 | 2026-03-26 | In-person visit | Duration: 14 min

HCP: Dr. Fatima Lewis (Hematology-Oncology)

Site: University Cancer Center, Los Angeles, CA

Primary TA: Gastric Cancer | MSL: Dr. Tom Reyes

Note: Engaged Dr. Fatima Lewis on datopotamab deruxtecan in Gastric Cancer. Attended the Dato-DXd session at WCLC and asked about TROP2 biomarker selection. High interest; requested follow-up on patient-selection criteria and companion diagnostic availability.

MSL-FN-0014 | 2026-03-17 | In-person visit | Duration: 27 min

HCP: Dr. Susan Jackson (Pulmonology)

Site: Memorial Oncology Institute, Los Angeles, CA

Primary TA: HER2+ Breast Cancer | MSL: Dr. Priya Raman

Note: Dr. Susan Jackson noted that a competitor MSL recently discussed sacituzumab govitecan and requested balanced comparative efficacy and safety. Asked for our latest congress data. Time-sensitive follow-up requested.

MSL-FN-0015 | 2026-03-08 | In-person visit | Duration: 40 min

HCP: Dr. Michael Walker (Hematology-Oncology)

Site: Sacred Heart Health System, Houston, TX

Primary TA: NSCLC | MSL: Dr. Sam Okafor

Note: Discussed the gastric cancer indication and HER2 testing standardization with Dr. Michael Walker. Frustrated by limited local testing capacity. Interested in diagnostic-pathway support and asked to reconnect at the upcoming GI congress.

MSL-FN-0016 | 2026-02-27 | In-person visit | Duration: 53 min

HCP: Dr. Emily Miller (Hematology-Oncology)

Site: University Oncology Institute, Atlanta, GA

Primary TA: Colorectal Cancer | MSL: Dr. Hana Kim

Note: Brief virtual check-in with Dr. Emily Miller. Satisfied with current data and had no new questions this cycle. Low engagement; maintain routine cadence with no specific follow-up required.

MSL-FN-0017 | 2026-02-18 | In-person visit | Duration: 11 min

HCP: Dr. Anthony Thomas (Gastrointestinal Oncology)

Site: Northwell Hospital, Chicago, IL

Primary TA: HER2+ Breast Cancer | MSL: Dr. Alan Brooks

Note: Brief hallway conversation with Dr. Anthony Thomas at ASCO. Mentioned interest in CNS activity of trastuzumab deruxtecan in patients with brain metastases. Requested follow-up with the DESTINY-Breast12 CNS dataset.

MSL-FN-0018 | 2026-02-09 | In-person visit | Duration: 24 min

HCP: Dr. Carlos Adams (Pulmonology)

Site: Presbyterian Health System, Houston, TX

Primary TA: HER2-low Breast Cancer | MSL: Dr. Elena Ruiz

Note: Dr. Carlos Adams discussed evolving treatment sequencing in HER2-low Breast Cancer and asked how our data informs earlier-line use. Engaged and data-driven; requested the latest progression-free survival analyses.

MSL-FN-0019 | 2026-01-31 | In-person visit | Duration: 37 min

HCP: Dr. Joseph Perez (Gastrointestinal Oncology)

Site: Northwell Medical Center, Miami, FL

Primary TA: HER2-mutant NSCLC | MSL: Dr. Greg Sullivan

Note: Dr. Joseph Perez had repeated safety inquiries regarding pneumonitis rates and corticosteroid management. Cautious prescriber who needs reassurance and the approved safety profile. Medium-priority follow-up by email.

MSL-FN-0020 | 2026-01-22 | In-person visit | Duration: 50 min

HCP: Dr. Susan Garcia (Medical Oncology)

Site: Metro Medical Center, Cleveland, OH

Primary TA: Gastric Cancer | MSL: Dr. Karen Mitchell

Note: Dr. Susan Garcia discussed long-term efficacy data for trastuzumab deruxtecan in previously treated Gastric Cancer. Expressed strong interest in upcoming real-world evidence and requested follow-up after the ESMO congress. Positive engagement; asked that the approved RWE publication be shared.

MSL-FN-0021 | 2026-01-13 | In-person visit | Duration: 63 min

HCP: Dr. Omar Davis (Gastrointestinal Oncology)

Site: Memorial Oncology Institute, Atlanta, GA

Primary TA: Colorectal Cancer | MSL: Dr. Marcus Webb

Note: Dr. Omar Davis attended our advisory board and asked detailed questions about duration of response and long-term efficacy. Interested in collaborating on an investigator-initiated study. High-value KOL ? prioritize follow-up.

MSL-FN-0022 | 2026-07-18 | In-person visit | Duration: 21 min

HCP: Dr. Carlos Thomas (Breast Oncology)

Site: Presbyterian Cancer Center, Phoenix, AZ

Primary TA: NSCLC | MSL: Dr. Nina Patel

Note: Dr. Carlos Thomas asked about efficacy in HER2-low disease following DESTINY-Breast04 and is currently comparing outcomes against sacituzumab govitecan. Neutral sentiment; requested comparative evidence and relevant subgroup analyses.

MSL-FN-0023 | 2026-07-09 | In-person visit | Duration: 34 min

HCP: Dr. Nancy Patel (Medical Oncology)

Site: Sacred Heart Health System, Cleveland, OH

Primary TA: NSCLC | MSL: Dr. Tom Reyes

Note: Dr. Nancy Patel requested efficacy and tolerability data in elderly and frail patients, citing tolerability concerns. Interested in dose-optimization studies. Neutral-to-positive; follow-up with real-world tolerability data.

MSL-FN-0024 | 2026-06-30 | In-person visit | Duration: 47 min

HCP: Dr. David Chen (Medical Oncology)

Site: Sacred Heart Medical Center, Nashville, TN

Primary TA: NSCLC | MSL: Dr. Priya Raman

Note: Dr. David Chen inquired about dosing modifications and antiemetic management with T-DXd. Reports good clinical responses but wants practical guidance for the community setting. Requested nurse education materials; follow-up requested.

MSL-FN-0025 | 2026-06-21 | In-person visit | Duration: 60 min

HCP: Dr. James Anderson (Surgical Oncology)

Site: Memorial Medical Center, Houston, TX

Primary TA: Gastric Cancer | MSL: Dr. Sam Okafor

Note: Dr. James Anderson is an emerging investigator asking about combination strategies with immunotherapy. High scientific curiosity and growing interest in ADC combinations. Requested preclinical rationale and trial-enrollment information.

MSL-FN-0026 | 2026-06-12 | In-person visit | Duration: 18 min

HCP: Dr. Susan Hernandez (Hematology-Oncology)

Site: Memorial Cancer Center, Boston, MA

Primary TA: Colorectal Cancer | MSL: Dr. Hana Kim

Note: Dr. Susan Hernandez expressed strong interest in real-world evidence for long-term outcomes beyond the trial population. Skeptical of cross-trial comparisons; requested head-to-head data where available. Highly engaged academic KOL.

MSL-FN-0027 | 2026-06-03 | In-person visit | Duration: 31 min

HCP: Dr. Nancy Perez (Breast Oncology)

Site: Providence Oncology Institute, Houston, TX

Primary TA: Gastric Cancer | MSL: Dr. Alan Brooks

Note: Dr. Nancy Perez raised an unmet need around ILD early-detection and monitoring guidance in real-world practice. Very engaged; requested an educational webinar for the care team and a pulmonology collaboration follow-up.

MSL-FN-0028 | 2026-05-25 | In-person visit | Duration: 44 min

HCP: Dr. Michael Thomas (Medical Oncology)

Site: Presbyterian Medical Center, Baltimore, MD

Primary TA: NSCLC | MSL: Dr. Elena Ruiz

Note: Dr. Michael Thomas asked about optimal sequencing of ADCs and resistance mechanisms after prior T-DXd, comparing with tucatinib-based combinations. Very engaged; wants a scientific exchange on sequencing after the next tumor board.

MSL-FN-0029 | 2026-05-16 | In-person visit | Duration: 57 min

HCP: Dr. David Martinez (Pulmonology)

Site: University Hospital, Atlanta, GA

Primary TA: HER2+ Breast Cancer | MSL: Dr. Greg Sullivan

Note: Dr. David Martinez asked about quality-of-life and patient-reported outcomes data. Interested in shared decision-making tools for patients. Positive; requested approved patient education materials.

MSL-FN-0030 | 2026-05-07 | In-person visit | Duration: 15 min

HCP: Dr. William King (Medical Oncology)

Site: Presbyterian Comprehensive Cancer Institute, Miami, FL

Primary TA: NSCLC | MSL: Dr. Karen Mitchell

Note: Reviewed NSCLC data with Dr. William King, focused on HER2 amplification as an emerging target. Interested but noted a limited relevant patient population. Low near-term interest; values ongoing scientific updates.

MSL-FN-0031 | 2026-04-28 | In-person visit | Duration: 28 min

HCP: Dr. Matthew Perez (Surgical Oncology)

Site: University Comprehensive Cancer Institute, Miami, FL

Primary TA: HER2-mutant NSCLC | MSL: Dr. Marcus Webb

Note: Dr. Matthew Perez raised detailed questions about interstitial lung disease (ILD) monitoring and dose management with Enhertu. Concerned about tolerability in older patients. Requested the approved safety summary and pneumonitis management algorithm. Follow-up needed within two weeks.

MSL-FN-0032 | 2026-04-19 | In-person visit | Duration: 41 min

HCP: Dr. Ananya Martinez (Pulmonology)

Site: Baptist Health System, New York, NY

Primary TA: HER2+ Breast Cancer | MSL: Dr. Nina Patel

Note: Engagement with Dr. Ananya Martinez centered on patient selection and biomarker testing for HER2+ Breast Cancer. Compares experience with prior targeted agents. Requested the relevant DESTINY publication and a testing algorithm. Positive tone.

MSL-FN-0033 | 2026-04-10 | In-person visit | Duration: 54 min

HCP: Dr. Elizabeth Moore (Radiation Oncology)

Site: Cedars Oncology Institute, Denver, CO

Primary TA: Colorectal Cancer | MSL: Dr. Tom Reyes

Note: Engaged Dr. Elizabeth Moore on datopotamab deruxtecan in Colorectal Cancer. Attended the Dato-DXd session at WCLC and asked about TROP2 biomarker selection. High interest; requested follow-up on patient-selection criteria and companion diagnostic availability.

MSL-FN-0034 | 2026-04-01 | In-person visit | Duration: 12 min

HCP: Dr. Mei Lewis (Surgical Oncology)

Site: Metro Oncology Institute, Atlanta, GA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Priya Raman

Note: Dr. Mei Lewis noted that a competitor MSL recently discussed sacituzumab govitecan and requested balanced comparative efficacy and safety. Asked for our latest congress data. Time-sensitive follow-up requested.

MSL-FN-0035 | 2026-03-23 | In-person visit | Duration: 25 min

HCP: Dr. Ananya Wilson (Gastrointestinal Oncology)

Site: Providence Oncology Institute, Houston, TX

Primary TA: Colorectal Cancer | MSL: Dr. Sam Okafor

Note: Discussed the gastric cancer indication and HER2 testing standardization with Dr. Ananya Wilson. Frustrated by limited local testing capacity. Interested in diagnostic-pathway support and asked to reconnect at the upcoming GI congress.

MSL-FN-0036 | 2026-03-14 | In-person visit | Duration: 38 min

HCP: Dr. Michael Allen (Surgical Oncology)

Site: Metro Cancer Center, San Francisco, CA

Primary TA: HER2+ Breast Cancer | MSL: Dr. Hana Kim

Note: Brief virtual check-in with Dr. Michael Allen. Satisfied with current data and had no new questions this cycle. Low engagement; maintain routine cadence with no specific follow-up required.

MSL-FN-0037 | 2026-03-05 | In-person visit | Duration: 51 min

HCP: Dr. Daniel Lopez (Pulmonology)

Site: Providence Oncology Institute, San Francisco, CA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Alan Brooks

Note: Brief hallway conversation with Dr. Daniel Lopez at ASCO. Mentioned interest in CNS activity of trastuzumab deruxtecan in patients with brain metastases. Requested follow-up with the DESTINY-Breast12 CNS dataset.

MSL-FN-0038 | 2026-02-24 | In-person visit | Duration: 64 min

HCP: Dr. Sarah Robinson (Medical Oncology)

Site: Regional Comprehensive Cancer Institute, Boston, MA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Elena Ruiz

Note: Dr. Sarah Robinson discussed evolving treatment sequencing in HER2-low Breast Cancer and asked how our data informs earlier-line use. Engaged and data-driven; requested the latest progression-free survival analyses.

MSL-FN-0039 | 2026-02-15 | In-person visit | Duration: 22 min

HCP: Dr. Wei Wilson (Radiation Oncology)

Site: Northwell Oncology Institute, Seattle, WA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Greg Sullivan

Note: Dr. Wei Wilson had repeated safety inquiries regarding pneumonitis rates and corticosteroid management. Cautious prescriber who needs reassurance and the approved safety profile. Medium-priority follow-up by email.

MSL-FN-0040 | 2026-02-06 | In-person visit | Duration: 35 min

HCP: Dr. Sofia Allen (Gastrointestinal Oncology)

Site: Regional Oncology Institute, Miami, FL

Primary TA: Gastric Cancer | MSL: Dr. Karen Mitchell

Note: Dr. Sofia Allen discussed long-term efficacy data for trastuzumab deruxtecan in previously treated Gastric Cancer. Expressed strong interest in upcoming real-world evidence and requested follow-up after the ESMO congress. Positive engagement; asked that the approved RWE publication be shared.

MSL-FN-0041 | 2026-01-28 | In-person visit | Duration: 48 min

HCP: Dr. James Walker (Medical Oncology)

Site: Providence Cancer Center, Dallas, TX

Primary TA: Colorectal Cancer | MSL: Dr. Marcus Webb

Note: Dr. James Walker attended our advisory board and asked detailed questions about duration of response and long-term efficacy. Interested in collaborating on an investigator-initiated study. High-value KOL ? prioritize follow-up.

MSL-FN-0042 | 2026-01-19 | In-person visit | Duration: 61 min

HCP: Dr. Sarah Chen (Medical Oncology)

Site: Metro Oncology Institute, Miami, FL

Primary TA: HER2+ Breast Cancer | MSL: Dr. Nina Patel

Note: Dr. Sarah Chen asked about efficacy in HER2-low disease following DESTINY-Breast04 and is currently comparing outcomes against sacituzumab govitecan. Neutral sentiment; requested comparative evidence and relevant subgroup analyses.

MSL-FN-0043 | 2026-01-10 | In-person visit | Duration: 19 min

HCP: Dr. Wei Walker (Medical Oncology)

Site: St. Mary Oncology Institute, Boston, MA

Primary TA: Colorectal Cancer | MSL: Dr. Tom Reyes

Note: Dr. Wei Walker requested efficacy and tolerability data in elderly and frail patients, citing tolerability concerns. Interested in dose-optimization studies. Neutral-to-positive; follow-up with real-world tolerability data.

MSL-FN-0044 | 2026-07-15 | In-person visit | Duration: 32 min

HCP: Dr. Leila King (Hematology-Oncology)

Site: Presbyterian Health System, San Francisco, CA

Primary TA: Colorectal Cancer | MSL: Dr. Priya Raman

Note: Dr. Leila King inquired about dosing modifications and antiemetic management with T-DXd. Reports good clinical responses but wants practical guidance for the community setting. Requested nurse education materials; follow-up requested.

MSL-FN-0045 | 2026-07-06 | In-person visit | Duration: 45 min

HCP: Dr. Nancy Davis (Medical Oncology)

Site: Regional Cancer Center, Houston, TX

Primary TA: HER2-mutant NSCLC | MSL: Dr. Sam Okafor

Note: Dr. Nancy Davis is an emerging investigator asking about combination strategies with immunotherapy. High scientific curiosity and growing interest in ADC combinations. Requested preclinical rationale and trial-enrollment information.

MSL-FN-0046 | 2026-06-27 | In-person visit | Duration: 58 min

HCP: Dr. Emily Jones (Medical Oncology)

Site: Memorial Medical Center, Denver, CO

Primary TA: HER2-low Breast Cancer | MSL: Dr. Hana Kim

Note: Dr. Emily Jones expressed strong interest in real-world evidence for long-term outcomes beyond the trial population. Skeptical of cross-trial comparisons; requested head-to-head data where available.

Highly engaged academic KOL.

MSL-FN-0047 | 2026-06-18 | In-person visit | Duration: 16 min

HCP: Dr. Yuki Taylor (Medical Oncology)

Site: Sacred Heart Oncology Institute, Phoenix, AZ

Primary TA: NSCLC | MSL: Dr. Alan Brooks

Note: Dr. Yuki Taylor raised an unmet need around ILD early-detection and monitoring guidance in real-world practice. Very engaged; requested an educational webinar for the care team and a pulmonology collaboration follow-up.

MSL-FN-0048 | 2026-06-09 | In-person visit | Duration: 29 min

HCP: Dr. Ravi Brown (Medical Oncology)

Site: Memorial Oncology Institute, Philadelphia, PA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Elena Ruiz

Note: Dr. Ravi Brown asked about optimal sequencing of ADCs and resistance mechanisms after prior T-DXd, comparing with tucatinib-based combinations. Very engaged; wants a scientific exchange on sequencing after the next tumor board.

MSL-FN-0049 | 2026-05-31 | In-person visit | Duration: 42 min

HCP: Dr. Ashley Taylor (Thoracic Oncology)

Site: University Medical Center, Philadelphia, PA

Primary TA: HER2+ Breast Cancer | MSL: Dr. Greg Sullivan

Note: Dr. Ashley Taylor asked about quality-of-life and patient-reported outcomes data. Interested in shared decision-making tools for patients. Positive; requested approved patient education materials.

MSL-FN-0050 | 2026-05-22 | In-person visit | Duration: 55 min

HCP: Dr. Daniel Thomas (Pulmonology)

Site: Presbyterian Health System, Dallas, TX

Primary TA: HER2-mutant NSCLC | MSL: Dr. Karen Mitchell

Note: Reviewed HER2-mutant NSCLC data with Dr. Daniel Thomas, focused on HER2 amplification as an emerging target. Interested but noted a limited relevant patient population. Low near-term interest; values ongoing scientific updates.

MSL-FN-0051 | 2026-05-13 | In-person visit | Duration: 13 min

HCP: Dr. Margaret Wilson (Thoracic Oncology)

Site: Metro Hospital, Philadelphia, PA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Marcus Webb

Note: Dr. Margaret Wilson raised detailed questions about interstitial lung disease (ILD) monitoring and dose management with Enhertu. Concerned about tolerability in older patients. Requested the approved safety summary and pneumonitis management algorithm. Follow-up needed within two weeks.

MSL-FN-0052 | 2026-05-04 | In-person visit | Duration: 26 min

HCP: Dr. David Martin (Thoracic Oncology)

Site: Metro Oncology Institute, Cleveland, OH

Primary TA: HER2-mutant NSCLC | MSL: Dr. Nina Patel

Note: Engagement with Dr. David Martin centered on patient selection and biomarker testing for HER2-mutant NSCLC. Compares experience with prior targeted agents. Requested the relevant DESTINY publication and a testing algorithm. Positive tone.

MSL-FN-0053 | 2026-04-25 | In-person visit | Duration: 39 min

HCP: Dr. Robert Wright (Medical Oncology)

Site: Mercy Medical Center, Philadelphia, PA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Tom Reyes

Note: Engaged Dr. Robert Wright on datopotamab deruxtecan in HER2-low Breast Cancer. Attended the Dato-DXd session at WCLC and asked about TROP2 biomarker selection. High interest; requested follow-up on patient-selection criteria and companion diagnostic availability.

MSL-FN-0054 | 2026-04-16 | In-person visit | Duration: 52 min

HCP: Dr. Mei Kim (Surgical Oncology)

Site: Northwell Hospital, Boston, MA

Primary TA: Colorectal Cancer | MSL: Dr. Priya Raman

Note: Dr. Mei Kim noted that a competitor MSL recently discussed sacituzumab govitecan and requested balanced comparative efficacy and safety. Asked for our latest congress data. Time-sensitive follow-up requested.

MSL-FN-0055 | 2026-04-07 | In-person visit | Duration: 10 min

HCP: Dr. Yuki Nguyen (Breast Oncology)

Site: Providence Medical Center, Baltimore, MD

Primary TA: NSCLC | MSL: Dr. Sam Okafor

Note: Discussed the gastric cancer indication and HER2 testing standardization with Dr. Yuki Nguyen. Frustrated by limited local testing capacity. Interested in diagnostic-pathway support and asked to reconnect at the upcoming GI congress.

MSL-FN-0056 | 2026-03-29 | In-person visit | Duration: 23 min

HCP: Dr. Anthony Lopez (Hematology-Oncology)

Site: Northwell Hospital, New York, NY

Primary TA: NSCLC | MSL: Dr. Hana Kim

Note: Brief virtual check-in with Dr. Anthony Lopez. Satisfied with current data and had no new questions this cycle. Low engagement; maintain routine cadence with no specific follow-up required.

MSL-FN-0057 | 2026-03-20 | In-person visit | Duration: 36 min

HCP: Dr. Ananya Allen (Hematology-Oncology)

Site: St. Mary Hospital, Houston, TX

Primary TA: HER2-low Breast Cancer | MSL: Dr. Alan Brooks

Note: Brief hallway conversation with Dr. Ananya Allen at ASCO. Mentioned interest in CNS activity of trastuzumab deruxtecan in patients with brain metastases. Requested follow-up with the DESTINY-Breast12 CNS dataset.

MSL-FN-0058 | 2026-03-11 | In-person visit | Duration: 49 min

HCP: Dr. Priya Scott (Breast Oncology)

Site: Providence Health System, Chicago, IL

Primary TA: HER2-low Breast Cancer | MSL: Dr. Elena Ruiz

Note: Dr. Priya Scott discussed evolving treatment sequencing in HER2-low Breast Cancer and asked how our data informs earlier-line use. Engaged and data-driven; requested the latest progression-free survival analyses.

MSL-FN-0059 | 2026-03-02 | In-person visit | Duration: 62 min

HCP: Dr. Linda Taylor (Gastrointestinal Oncology)

Site: Regional Cancer Center, Phoenix, AZ

Primary TA: HER2+ Breast Cancer | MSL: Dr. Greg Sullivan

Note: Dr. Linda Taylor had repeated safety inquiries regarding pneumonitis rates and corticosteroid management. Cautious prescriber who needs reassurance and the approved safety profile. Medium-priority follow-up by email.

MSL-FN-0060 | 2026-02-21 | In-person visit | Duration: 20 min

HCP: Dr. Ananya Taylor (Breast Oncology)

Site: Regional Cancer Center, San Francisco, CA

Primary TA: NSCLC | MSL: Dr. Karen Mitchell

Note: Dr. Ananya Taylor discussed long-term efficacy data for trastuzumab deruxtecan in previously treated NSCLC. Expressed strong interest in upcoming real-world evidence and requested follow-up after the ESMO congress. Positive engagement; asked that the approved RWE publication be shared.

MSL-FN-0061 | 2026-02-12 | In-person visit | Duration: 33 min

HCP: Dr. Daniel Ramirez (Breast Oncology)

Site: Baptist Health System, Baltimore, MD

Primary TA: NSCLC | MSL: Dr. Marcus Webb

Note: Dr. Daniel Ramirez attended our advisory board and asked detailed questions about duration of response and long-term efficacy. Interested in collaborating on an investigator-initiated study. High-value KOL ? prioritize follow-up.

MSL-FN-0062 | 2026-02-03 | In-person visit | Duration: 46 min

HCP: Dr. Carlos Robinson (Thoracic Oncology)

Site: Baptist Medical Center, Philadelphia, PA

Primary TA: NSCLC | MSL: Dr. Nina Patel

Note: Dr. Carlos Robinson asked about efficacy in HER2-low disease following DESTINY-Breast04 and is currently comparing outcomes against sacituzumab govitecan. Neutral sentiment; requested comparative evidence and relevant subgroup analyses.

MSL-FN-0063 | 2026-01-25 | In-person visit | Duration: 59 min

HCP: Dr. Robert Martin (Medical Oncology)

Site: Memorial Oncology Institute, Philadelphia, PA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Tom Reyes

Note: Dr. Robert Martin requested efficacy and tolerability data in elderly and frail patients, citing tolerability concerns. Interested in dose-optimization studies. Neutral-to-positive; follow-up with real-world tolerability data.

MSL-FN-0064 | 2026-01-16 | In-person visit | Duration: 17 min

HCP: Dr. Robert White (Thoracic Oncology)

Site: Providence Health System, San Francisco, CA

Primary TA: NSCLC | MSL: Dr. Priya Raman

Note: Dr. Robert White inquired about dosing modifications and antiemetic management with T-DXd. Reports good clinical responses but wants practical guidance for the community setting. Requested nurse education materials; follow-up requested.

MSL-FN-0065 | 2026-07-21 | In-person visit | Duration: 30 min

HCP: Dr. Linda Jackson (Radiation Oncology)

Site: Cedars Comprehensive Cancer Institute, Dallas, TX

Primary TA: HER2-mutant NSCLC | MSL: Dr. Sam Okafor

Note: Dr. Linda Jackson is an emerging investigator asking about combination strategies with

immunotherapy. High scientific curiosity and growing interest in ADC combinations. Requested preclinical rationale and trial-enrollment information.

MSL-FN-0066 | 2026-07-12 | In-person visit | Duration: 43 min

HCP: Dr. Rajesh King (Breast Oncology)

Site: Metro Oncology Institute, Atlanta, GA

Primary TA: HER2-low Breast Cancer | MSL: Dr. Hana Kim

Note: Dr. Rajesh King expressed strong interest in real-world evidence for long-term outcomes beyond the trial population. Skeptical of cross-trial comparisons; requested head-to-head data where available.

Highly engaged academic KOL.

MSL-FN-0067 | 2026-07-03 | In-person visit | Duration: 56 min

HCP: Dr. Nancy Davis (Radiation Oncology)

Site: Regional Oncology Institute, Baltimore, MD

Primary TA: HER2-low Breast Cancer | MSL: Dr. Alan Brooks

Note: Dr. Nancy Davis raised an unmet need around ILD early-detection and monitoring guidance in real-world practice. Very engaged; requested an educational webinar for the care team and a pulmonology collaboration follow-up.

MSL-FN-0068 | 2026-06-24 | In-person visit | Duration: 14 min

HCP: Dr. Ravi Hernandez (Gastrointestinal Oncology)

Site: Northwell Oncology Institute, New York, NY

Primary TA: NSCLC | MSL: Dr. Elena Ruiz

Note: Dr. Ravi Hernandez asked about optimal sequencing of ADCs and resistance mechanisms after prior T-DXd, comparing with tucatinib-based combinations. Very engaged; wants a scientific exchange on sequencing after the next tumor board.

MSL-FN-0069 | 2026-06-15 | In-person visit | Duration: 27 min

HCP: Dr. Sofia Rodriguez (Medical Oncology)

Site: Memorial Medical Center, Los Angeles, CA

Primary TA: Colorectal Cancer | MSL: Dr. Greg Sullivan

Note: Dr. Sofia Rodriguez asked about quality-of-life and patient-reported outcomes data. Interested in shared decision-making tools for patients. Positive; requested approved patient education materials.

MSL-FN-0070 | 2026-06-06 | In-person visit | Duration: 40 min

HCP: Dr. Rajesh Kim (Radiation Oncology)

Site: Presbyterian Comprehensive Cancer Institute, Dallas, TX

Primary TA: Colorectal Cancer | MSL: Dr. Karen Mitchell

Note: Reviewed Colorectal Cancer data with Dr. Rajesh Kim, focused on HER2 amplification as an emerging target. Interested but noted a limited relevant patient population. Low near-term interest; values ongoing scientific updates.

MSL-FN-0071 | 2026-05-28 | In-person visit | Duration: 53 min

HCP: Dr. Michael Moore (Thoracic Oncology)

Site: Mercy Hospital, Phoenix, AZ

Primary TA: HER2-mutant NSCLC | MSL: Dr. Marcus Webb

Note: Dr. Michael Moore raised detailed questions about interstitial lung disease (ILD) monitoring and dose management with Enhertu. Concerned about tolerability in older patients. Requested the approved safety summary and pneumonitis management algorithm. Follow-up needed within two weeks.

MSL-FN-0072 | 2026-05-19 | In-person visit | Duration: 11 min

HCP: Dr. Sandra Young (Medical Oncology)

Site: Baptist Comprehensive Cancer Institute, Houston, TX
Primary TA: HER2-mutant NSCLC | MSL: Dr. Nina Patel
Note: Engagement with Dr. Sandra Young centered on patient selection and biomarker testing for HER2-mutant NSCLC. Compares experience with prior targeted agents. Requested the relevant DESTINY publication and a testing algorithm. Positive tone.

MSL-FN-0073 | 2026-05-10 | In-person visit | Duration: 24 min

HCP: Dr. Fatima Lewis (Hematology-Oncology)
Site: University Cancer Center, Los Angeles, CA
Primary TA: Gastric Cancer | MSL: Dr. Tom Reyes
Note: Engaged Dr. Fatima Lewis on datopotamab deruxtecan in Gastric Cancer. Attended the Dato-DXd session at WCLC and asked about TROP2 biomarker selection. High interest; requested follow-up on patient-selection criteria and companion diagnostic availability.

MSL-FN-0074 | 2026-05-01 | In-person visit | Duration: 37 min

HCP: Dr. Susan Jackson (Pulmonology)
Site: Memorial Oncology Institute, Los Angeles, CA
Primary TA: HER2+ Breast Cancer | MSL: Dr. Priya Raman
Note: Dr. Susan Jackson noted that a competitor MSL recently discussed sacituzumab govitecan and requested balanced comparative efficacy and safety. Asked for our latest congress data. Time-sensitive follow-up requested.

MSL-FN-0075 | 2026-04-22 | In-person visit | Duration: 50 min

HCP: Dr. Michael Walker (Hematology-Oncology)
Site: Sacred Heart Health System, Houston, TX
Primary TA: NSCLC | MSL: Dr. Sam Okafor
Note: Discussed the gastric cancer indication and HER2 testing standardization with Dr. Michael Walker. Frustrated by limited local testing capacity. Interested in diagnostic-pathway support and asked to reconnect at the upcoming GI congress.

MSL-FN-0076 | 2026-04-13 | In-person visit | Duration: 63 min

HCP: Dr. Emily Miller (Hematology-Oncology)
Site: University Oncology Institute, Atlanta, GA
Primary TA: Colorectal Cancer | MSL: Dr. Hana Kim
Note: Brief virtual check-in with Dr. Emily Miller. Satisfied with current data and had no new questions this cycle. Low engagement; maintain routine cadence with no specific follow-up required.

MSL-FN-0077 | 2026-04-04 | In-person visit | Duration: 21 min

HCP: Dr. Anthony Thomas (Gastrointestinal Oncology)
Site: Northwell Hospital, Chicago, IL
Primary TA: HER2+ Breast Cancer | MSL: Dr. Alan Brooks
Note: Brief hallway conversation with Dr. Anthony Thomas at ASCO. Mentioned interest in CNS activity of trastuzumab deruxtecan in patients with brain metastases. Requested follow-up with the DESTINY-Breast12 CNS dataset.

MSL-FN-0078 | 2026-03-26 | In-person visit | Duration: 34 min

HCP: Dr. Carlos Adams (Pulmonology)
Site: Presbyterian Health System, Houston, TX
Primary TA: HER2-low Breast Cancer | MSL: Dr. Elena Ruiz
Note: Dr. Carlos Adams discussed evolving treatment sequencing in HER2-low Breast Cancer and asked how our data informs earlier-line use. Engaged and data-driven; requested the latest progression-free survival analyses.

MSL-FN-0079 | 2026-03-17 | In-person visit | Duration: 47 min

HCP: Dr. Joseph Perez (Gastrointestinal Oncology)

Site: Northwell Medical Center, Miami, FL

Primary TA: HER2-mutant NSCLC | MSL: Dr. Greg Sullivan

Note: Dr. Joseph Perez had repeated safety inquiries regarding pneumonitis rates and corticosteroid management. Cautious prescriber who needs reassurance and the approved safety profile. Medium-priority follow-up by email.

MSL-FN-0080 | 2026-03-08 | In-person visit | Duration: 60 min

HCP: Dr. Susan Garcia (Medical Oncology)

Site: Metro Medical Center, Cleveland, OH

Primary TA: Gastric Cancer | MSL: Dr. Karen Mitchell

Note: Dr. Susan Garcia discussed long-term efficacy data for trastuzumab deruxtecan in previously treated Gastric Cancer. Expressed strong interest in upcoming real-world evidence and requested follow-up after the ESMO congress. Positive engagement; asked that the approved RWE publication be shared.

MSL-FN-0081 | 2026-02-27 | In-person visit | Duration: 18 min

HCP: Dr. Omar Davis (Gastrointestinal Oncology)

Site: Memorial Oncology Institute, Atlanta, GA

Primary TA: Colorectal Cancer | MSL: Dr. Marcus Webb

Note: Dr. Omar Davis attended our advisory board and asked detailed questions about duration of response and long-term efficacy. Interested in collaborating on an investigator-initiated study. High-value KOL ? prioritize follow-up.

MSL-FN-0082 | 2026-02-18 | In-person visit | Duration: 31 min

HCP: Dr. Carlos Thomas (Breast Oncology)

Site: Presbyterian Cancer Center, Phoenix, AZ

Primary TA: NSCLC | MSL: Dr. Nina Patel

Note: Dr. Carlos Thomas asked about efficacy in HER2-low disease following DESTINY-Breast04 and is currently comparing outcomes against sacituzumab govitecan. Neutral sentiment; requested comparative evidence and relevant subgroup analyses.

MSL-FN-0083 | 2026-02-09 | In-person visit | Duration: 44 min

HCP: Dr. Nancy Patel (Medical Oncology)

Site: Sacred Heart Health System, Cleveland, OH

Primary TA: NSCLC | MSL: Dr. Tom Reyes

Note: Dr. Nancy Patel requested efficacy and tolerability data in elderly and frail patients, citing tolerability concerns. Interested in dose-optimization studies. Neutral-to-positive; follow-up with real-world tolerability data.

MSL-FN-0084 | 2026-01-31 | In-person visit | Duration: 57 min

HCP: Dr. David Chen (Medical Oncology)

Site: Sacred Heart Medical Center, Nashville, TN

Primary TA: NSCLC | MSL: Dr. Priya Raman

Note: Dr. David Chen inquired about dosing modifications and antiemetic management with T-DXd. Reports good clinical responses but wants practical guidance for the community setting. Requested nurse education materials; follow-up requested.

MSL-FN-0085 | 2026-01-22 | In-person visit | Duration: 15 min

HCP: Dr. James Anderson (Surgical Oncology)

Site: Memorial Medical Center, Houston, TX

Primary TA: Gastric Cancer | MSL: Dr. Sam Okafor

Note: Dr. James Anderson is an emerging investigator asking about combination strategies with immunotherapy. High scientific curiosity and growing interest in ADC combinations. Requested preclinical rationale and trial-enrollment information.
